IMPORTANT UPDATE ON CASE REPORTING

Please note that information highlighted in yellow reflects new and updated information.

Below are the case numbers for the previous week, as well as the overall case count generated by CDRSS reports. Remember that these numbers do NOT account for at-home tests, duplicates, and cases that are out of jurisdiction.

2/11/22 through 2/17/22: 6 new cases

The total number of COVID-19 cases for the Township of Little Falls is 2,610.

With a heavy heart, we are announcing an additional COVID-19 death in the Township of Little Falls that took place in the last week involving a 85-year-old female. Our sincerest condolences go out to the loved ones of this community member.

The total number of COVID-19-related deaths in the Township of Little Falls is 18.

Due to an unprecedented and ongoing surge in COVID-19 cases, effective December 17, 2021, the Clifton Health Department is utilizing Township of Little Falls COVID-19 data recorded in the Communicable Disease Reporting Surveillance System (CDRSS). CDRSS is the system used by the NJ Department of Health to track COVID-19 cases. While the Health Department was already using this system for case reporting, we would initially ensure that any cases that were found to be out of jurisdiction, and any cases found to be duplicates of existing cases were removed from the weekly case counts and overall case count. Our goal was always to provide the community with the most accurate representation of COVID-19 in the Township of Little Falls.
