Little Falls Monthly Report

September 2023

During the month of September, the Communicable Disease team provided outreach education at the Little Falls Library. On September 28, 2023, the Little Falls Public Library hosted a Health Fair. This was a great event because we were able to share health department information and network with other health organizations that were present. During this event, we promoted events such as; BEST EYE screening, mental health screening, Satellite Office calendar, and test kit flyers. Even though the team shared test kit flyers, we also provided the community with COVID-19 test kits. This was very important for us to bring because we wanted to make sure students and families had access to tests during the school year. It was a very nice event and we are hoping to collaborate with the library to host most health fairs in the future.
