

# LITTLE FALLS WATCH

## A PARTNERSHIP WITH OUR COMMUNITY

### HOW IT WORKS

Little Falls Watch works by using the geographic locations of the registered cameras. The police department will be able to directly call or e-mail citizens in the area where a crime occurs. You will only be contacted if there is an incident within the vicinity of your camera system and we may request to review video to assist with our investigation.

### ACCESS

To further connect with our community, the Little Falls Police Department is requesting residents and businesses **voluntarily** register their privately owned surveillance camera systems. We would *not* be able to access your camera system at any time.

### BENEFITS

Information captured on surveillance cameras may assist in the apprehension and prosecution of individuals involved in criminal activity in your neighborhood. The program is designed to streamline video evidence collection by building a database of available surveillance cameras in our community.

### REGISTRATION

To register your camera system with our police department, please complete a short form by scanning the QR code with your cell phone camera or type <https://forms.office.com/r/983EASdHTA> into your web browser.
